

COLLINS KIPKORIR

IT Assistant | IT Support & Systems Administration | Electronics & Computer Engineer

Nairobi, Kenya • +254 743 175 915 • kipkorirc583@gmail.com linkedin.com/in/collins-73kipkorir • collinskipkorir.netlify.app • github.com/kipkorir73

PROFESSIONAL SUMMARY

Electronics and Computer Engineering graduate with close to 3 years of hands-on IT support experience, covering first-line hardware and software troubleshooting, network administration, user account and access management, and day-to-day ICT operations. Currently serving as an IT Assistant at Sunrise Academy, where I support staff and students across PCs, printers, peripherals, biometric attendance systems, and a live network environment. Previously built and operated a 24/7 Wi-Fi network for 150+ users, maintaining 98% uptime through proactive monitoring and rapid issue resolution. Comfortable working under minimal supervision, following IT policies and basic cybersecurity practices, and communicating clearly with end users of varying technical levels.

CORE IT COMPETENCIES

First-Line IT Support	Hardware & Peripheral Troubleshooting	Networking & Connectivity
User Accounts & Access Rights	System Monitoring & Maintenance	Windows & Linux Environments
Basic Cybersecurity Practices	IT Asset Recordkeeping	L1 Support & Ticketing

PROFESSIONAL EXPERIENCE

- IT Assistant, Bursar & Admissions Coordinator** — Sunrise Academy 2025 – Present
- Provide first-line technical support to staff and students, troubleshooting hardware, software, and network issues on PCs, printers, and peripherals.
 - Install, configure, and maintain computer systems, peripherals, and Windows/Linux software to keep daily ICT operations running smoothly.
 - Manage biometric attendance systems and staff/student user accounts, handling access rights and account-level troubleshooting.
 - Support accurate system records and payment systems, and follow institutional IT policies and procedures in day-to-day work.
 - Work closely with management on institutional operations, coordinating independently and with minimal supervision.
- Wi-Fi Network Operator** — Campus Wi-Fi Business, Kirinyaga University 2022 – 2024
- Built and operated a 24/7 Wi-Fi network serving 150+ students using Ubiquiti Loco M5, LiteBeam, and MikroTik WinBox.
 - Configured DHCP, NAT, firewall rules, bandwidth limits, and user authentication — applying basic network security practices.
 - Monitored network traffic and system performance, achieving 98% uptime and under 15-minute outage response time.
 - Delivered phone, email, and chat-based technical support, resolving 95% of issues on first contact.
 - Maintained billing records, incident logs, and client communications, working independently under minimal supervision.
- Final-Year Project** — Underground Cable Fault Detection, Kirinyaga University 2023 – 2024
- Designed and implemented an IoT-based fault detection system using microcontrollers, sensors, and Proteus, achieving 80% detection accuracy under simulated conditions.
 - Collaborated with a team to meet project milestones and presented findings to a review panel.

TECHNICAL SKILLS

Networking & Systems: Ubiquiti (Loco M5, LiteBeam), MikroTik WinBox, LAN/WAN, DHCP, NAT, firewall setup, bandwidth management, system monitoring

Support & Troubleshooting: Windows, Linux, hardware/peripheral diagnostics, network connectivity, DNS, routing, L1 support & ticketing

Productivity & Collaboration: Microsoft Office, email and collaboration tools, Google Workspace basics

Security Awareness: Basic cybersecurity best practices, user access management, firewall/authentication configuration

Other Tools: Git, GitHub, Visual Studio Code, Figma, Proteus, AutoCAD, HTML/CSS/JavaScript

EDUCATION

Bachelor of Technology in Electronics & Computer Engineering — Kirinyaga University, 2020 – 2024

Software Engineering Bootcamp — Moringa School, 06/2023 – 11/2023

LANGUAGES & AVAILABILITY

Languages: English, Swahili

Availability: Able to work under minimal supervision and meet deadlines; open to standard office hours in Nairobi.
